TAKE THE ADVANTAGE

The Vantage® 400 CE and 500 CE are ones of the most compact and powerful engine-driven welders / generators in the construction, pipe or rental fleet market today.

They are also the most quiet, with a smooth running 4-cylinder Perkins® water-cooled diesel engines.

Use these multi-process welders for Stick welding with a large variety of electrodes, Lift TIG welding, CV welding with shielding gas or Innershield wires, and arc gouge up to 8 mm carbons for Vantage 400 and 10 mm carbons for Vantage 500.

You will value the superior arc performance delivered by exclusive Lincoln Chopper Technology™.

You will also appreciate VRD™ (Voltage Reduction Device™), which reduces OCV (open circuit voltage) in the CC-Stick weld mode for added safety. These models effectively generate high auxiliary power on 3-phase or 1-phase AC to power your lights, grinders, power tools, Inverters, etc...

Last but not least, they are housed in a rugged, low maintenance stainless steel enclosure and loaded with many innovative service features.

CHOPPER TECHNOLOGY™

Traditional technology

The weld control is more variable around the desired output.

Chopper technology™

Extremely fast response for tighter output control.

Patented and award-winning Lincoln Chopper Technology™ delivers superior DC arc welding performance for general purpose stick, Downhill Pipe, DC TIG, MIG, cored-wire and arc gouging. Benefits of Chopper Technology include:

- Easy arc starting
- Smooth arc action
- Low spatter levels
- Excellent bead Appearance
