

TIG - With or without Filler Wire, AVC, OSC

Open Welding Head

for welding of tube to tube joints,
tube to elbow joints...

MU IV Open Welding Head

for welding of tube to tube joints, tube to elbow joints...

A range of modular standard welding heads, perfectly adapted to your needs

General Characteristics

Advantages

- ▶ Productivity increase of more than one third
- ▶ Easy to use
- ▶ Challenging applications, even with delicate materials, can be welded
- ▶ Quick to set-up according to the workload making variations in production capacity trouble free
- ▶ Precision engineered assemblies for a lifetime of trouble-free service

Resulting from 50 years' experience in mastering welding technologies

MU IV for use with external wire feeder

Drive motor with angle gearbox for reduced axial clearance

MU IV with integrated wire feeder

MU IV with AVC/OSC

Associated Power Sources

▶ PS 164-2

160 A, "all inclusive", portable, single-phase power supply

▶ P4

170 A, "modular", portable, programming by PC or touch screen, single-phase power supply

▶ PS 406-2

400 A, "all inclusive", with Arc Voltage Control (AVC) and Torch Oscillation Control (OSC), three-phase power supply

▶ P6

300 A, "all applications", programming by PC or touch screen, with Arc Voltage Control (AVC) and Torch Oscillation Control (OSC), three-phase power supply

Wire Feeder

▶ Polyfil-3

External wire feeder and other integrated wire feeders

 Adapting to all your applications!

"As working conditions are better than in manual welding, a welding operator accomplishes on average 30% more welds per day."

Technical Specification

Cable length: 9 m

* on request

P – Adjustable clamping system

C – Adjustable clamping system

Options and Accessories

- On board wire feeder module for 1,5 kg spool or floor mounted POLYFIL with 15 kg spools
- Clamp shells (C-clamping system) for all tube and pipe O.D.'s
- Extension cable (15 m)
- Dual welding head switch box
- Compact shipping case for transport and storage
- Tungsten electrodes, pre-sharpened and pre-cut

► Guidance and technical support

A welding application specialist in your area will advise you on the welding process and appropriate equipment for your application.

► Commissioning / Training

A complete training program will enable you to start using the equipment immediately and in the best way possible.

► Maintenance / Repair

Maintenance and repair operations can be carried out at the Polysoude plant as well as on site by our service network.

► Rental service

Increase the flexibility of your production! A large range of equipment is available for rental from our hire fleet.
