A Welding Positioner assists the welding operator to rotate the work piece through 360 degrees to reposition the component for inspection or welding.

A Positioner gives the added advantage of a tilting function to tilt the work piece from horizontal to vertical to better position the component for down hand and automatic welding.

- **Bespoke Machines with choice of pendant or foot control**
- **New control units with 12 months warranty**
- **Colour Coded to match your existing workshop**
- **Fully Serviced with any worn parts replaced**
- **4 Months Parts and Labour warranty**
- **Availability 1-2 weeks from order**
- **Excellent After-Sales support**

Carrying Capacity - 25kg up to 20,000 kg
Manual or Power Tilt available

Huge choice of makes and models to suit any budget

See our web site www.westermans.com for our full range of New and Used Welding Positioners, Pipe Rotators and Column and Booms
