Why choose this machine?

The **ProArc TR-3504 Welding Rotators** are built for businesses that need safe, stable rotation of heavy cylindrical workpieces.

With a 3500kg load capacity, they offer smooth turning for tanks, pipes, and vessels — streamlining welding and fabrication processes.

Designed for efficiency and control, these rotators reduce manual handling, improve weld accuracy, and allow for continuous, high-quality welds with minimal downtime. Ideal for both manual and automated setups, they increase productivity while maintaining consistent results.

Robust, reliable, and built to last, the TR-3504 is a solid investment for workshops looking to improve workflow, safety, and output when working with large or round components.

Who is this machine for?

Perfect for fabrication shops, pressure vessel manufacturers, and pipework specialists handling cylindrical components up to 3500kg. The TR-3504 is ideal for teams looking to improve weld consistency, reduce manual handling, and safely rotate heavy workpieces during welding or assembly.

Industries include:

- Oil & gas
- Pressure vessel & tank fabrication
- Power generation & utilities
- Pipeline construction & maintenance
- Wind & renewable energy
- Stainless steel fabrication (drums/silos etc.)
- Shipbuilding & marine engineering
- Structural fabrication
- Custom manufacturing
