Why choose this machine?

Precision positioning made easy. With smooth 360° rotation and adjustable tilt, the PT-500 gives welders perfect access to joints. While reducing strain and helping deliver cleaner, more consistent welds.

Built for performance. Designed to handle workpieces up to 500kg, it's robustly built. The variable speed control and precise motor drive make it reliable. Even for demanding workshop environments.

Versatile across applications. From pipe and tank welding to structural fabrication and automated setups. The PT-500 easily adapts to a wide range of welding tasks and industries.

Improved safety and productivity. By bringing the work to the welder, it reduces the need for manual repositioning or awkward welding angles. Cutting down on operator and welder fatigue, setup time, and rework.

Who is this machine for?

The ProArc PT-500 is ideal for fabricators working with cylindrical, round, or heavy components up to 500kg. It's a perfect fit for industries where precision weld positioning and operator efficiency are key. Whether used in manual or automated setups, it improves weld access. As well as reducing fatigue, & boosting productivity.
