

# WELDABILITY PIPE CHAIN CLAMPS

Our chain clamps have been designed to offer the welder the best of both worlds, firstly a clamp with the strength and ability to align and lightly reform pipes and secondly, lightweight design and construction for ease of use.

One clamp can fit a wide range of sizes and the entire circumference of the pipe can be welded without removing the clamp.

Each clamp can fit-up Elbows, Tees, Flanges, End-caps and most other pipe fittings.

All chain and screws are zinc pasivated to eliminate weld spatter and corrosion.

Stainless steel models are also available.

- Our clamping feet are cast from the highest quality alloy steels. Our lightweight construction and design makes them strong and durable. All clamping feet have two aligning screws allowing reforming pressure to be applied to both pieces of pipe.

- The clamping feet are designed to allow clearance around the pipe for any welding torch or rod.

Registered in England No. 1684362  
Registered Office: as above

# VERSATILITY

Some examples of fit-ups with the Weldability pipe chain clamp.  
Each clamp is supplied with all accessories to carry out any fit-up  
and includes a steel storage box

Pipe to T-piece

Pipe to Flange

Pipe to End-cap

10" -36" and 6"-20" clamping feet.  
Heavy duty chain is also available

Fitting holder/adjuster

PART NO.	PIPE DIAMETER RANGE (Inches)	NO. OF CLAMPING FEET	APPROX. CLAMP WEIGHT (Kg)	APPROX. SHIPPING WEIGHT (Kg)
PPPW0620	6 to 20	7	9	16
PPPW0620SS*	6 to 20	7	9	16
PPPW1036	10 to 36	8	25	36
PPPW1036SS*	10 to 36	8	25	36

\* Stainless steel

Additional chain and clamping feet are available for adapting the Weldability pipe chain clamp to larger diameters.
