

DELTA SPOT

RESISTANCE SPOT WELDING

APPLICATIONS

- / Automotive industry
- / Railway vehicle construction
- / Aerospace industry
- / White goods

PRODUCT VARIANTS

C-GUN

X-GUN

STATIONARY SYSTEM

100% REPRODUCIBLE WELDING RESULTS

- / New contact surface for every welding spot
- / 4000-7000 spots without interruptions
- / No alloying of surface coatings or base material
- / No direct contact between the electrode and workpiece

ENERGY SAVING

- / The additional electrical resistance of the process tapes provides increased heat to the join, allowing the welding current to be reduced
- / Energy-saving potential, especially for aluminium applications

LESS REWORKING THANKS TO PERFECT SURFACE QUALITY

- / No welding spatter
- / Little surface deformation

FLEXIBILITY WHEN WELDING DIFFERENT SHEET THICKNESSES

- / Three-sheet joints with very different material thicknesses can be welded easily by using different process tapes on each side

What's your welding challenge?
